regensburg (de)

25 fragment(s)

revitalizes the neighborhood with a composition of fragments of the 8 groups and site.

fragmentation of the site_layout

As the unattended outdoor spaces and parking area fragmented, the nature of each became clear, and their relationship to other fragments became clear. Accordingly, the programs are arranged and the neighborhood is revitalized.

site strategies 25 fragment(s) as neighborhood scale The pre-existing cut-off green spaces, underutilised parking areas, and disconnected ground-level residences form fragmented relationships with the surroundings. Based on the urban context, these fragmented spaces are reorganised along the public mobility axis Vitusstraße and the resident axis Adalbert-Stifter-Straße. The fragmented spaces, diversified through various programs, are reorganised along five axes to create a new neighbourhood 1-2 public axes 2-3 public & semi public axes 4-5 semi private & private axes curculation system rainwater reuse and solar energy 5 steps of development
